

Introduction

Prince Muhammad bin Fahd University Award for Best Scientific Production

Prince Muhammad bin Fahd University (PMU) in the Kingdom of Saudi Arabia is one of the well-known, distinguished universities in the field of research and the use of modern technologies to develop scientific research in a way that serves the Kingdom's ambition to search for excellence, and to serve the Saudi and Arab societies in various fields of knowledge, society, and economy. The PMU has decided to participate in the global competition in research, leadership, and innovation to occupy the position it aspires to among the regional and international Arab universities. Among the ways adopted by Prince Muhammad bin Fahd University (PMU) is encouraging scientific research in the Arab world and motivating capable researchers in their work to innovate and lead by supporting their financial capabilities to participate in the competition. This award is the culmination of its goals and plans in drawing real milestones that pave the way for serious scientific research in various fields. No university in the Arab world is excluded from this because its officials believe that scientific research and technological development is a participatory renaissance mission between universities and individuals, and that the benefits of this research will reflect its beneficial to all Arab societies. It considered that the Association of Arab Universities is the appropriate institution that can lead this march and supervise this prestigious scientific activity, given the Association's pioneering role in coordination between Arab universities, and its long experience in embodying the great objectives of the Association's that it has drawn since its establishment to serve the Arab nation, , develop scientific research, the Arabic language, and our true Islamic religion.

Nomination for the award is only through universities

How to apply for the award

When applying for the award, the candidate university must send the award secretariat the following documents:

1. An overview of the university and its most important achievements, with a summary explaining the nature of the work submitted, its exact specialization, and the extent to which it fulfills the conditions.
2. The university should attach the CVs of the researchers, accompanied by a clear copy of their passports and photographs of them.
3. Uploading the "research" nominated for the award as a PDF file via the award website.
4. The winners will be announced at the award ceremony.

Conditions of research applied for the award

1. Authenticity
2. Scientific honesty
3. The foundations and components of innovation
4. Possibility of field application
5. The research production should have been published in a peer-reviewed or indexed scientific journal.
6. The research production may have been carried out through a number of master's and doctoral dissertations
7. The research should not have been submitted for a scientific award within a national or international competition
